

## The identification of word classes in connection with the differentiation between homonymy and polysemy

By Hendrikje Schulze

GRIN Verlag. Paperback. Book Condition: New. Paperback. 40 pages. Dimensions: 8.5in. x 5.5in. x 0.1in. Seminar paper from the year 2001 in the subject English Language and Literature Studies - Linguistics, grade: 2, 3, <http://www.uni-jena.de> (Anglistische Sprachwissenschaft), 16 entries in the bibliography, language: English, comment: This paper deals with the concepts of homonymy and polysemy. Both are explained theoretically and with regard to appropriate examples. Furthermore a textual analysis is given. , abstract: This paper is concerned with the linguistic phenomena of homonymy and polysemy. The term homonymy goes back to the Greek words *homs*, meaning the same, and *noma*, meaning name. A simplified translation of homonymy would be having the same name. The term polysemy goes back to the Greek language, too. It is composed of the words *polys*, meaning a lot of, and *sema*, which can be translated with meaning. Simply said polysemy is the phenomenon of one word carrying different meanings. Homonymy as well as polysemy are rather complex linguistic phenomena. Both have been discussed in connection with each other for a long time. The central point of discussion is the question whether one is confronted with different lexical items which are formally identical, i....
