Date :1998-3-1. is a professor at the University of Sydney. Australia. astronomers. His book is divided into four parts this first part: change the world; the second part: to explain the world; the third part: the scientific and cultural dimensions; Part IV: the religious dimension of science. The book is 160.000 words. written in very concise. This book I read in the 1980s. recently re-read it. I still think is very good. The latest version of the book is published by the Liaoning Education Press. is the new century other than the library. the one. the translator is to Lee wake up people. Book for today's Chinese people and re-submit what is science. the full text of writing concise. perspective in place. Although the new 1998 version. but I think not attract much response. The book's first and second part of the emphasis on two major characteristics of modern science. the ability to change the world of modern science. the author of history. scientists look to the characteristics of modern science is very popular to write well. After the two talked about the cultural dimensions of science. science and religious dimensions of the Chinese people relatively new. It describes the function of science. the rapid development of material life for the benefit of mankind. from material wealth to understand science. This book integrates the Greek scientific tradition since the proposed new science's purpose is to communicate the relationship between man and God. to enhance people's spiritual world. as Francis Bacon talking about: Science gives us a step closer away from God. This is the modern man in the past often ignored. Brown said the...
