Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Handwork and Its Place in Early Education This book is intended primarily for young students who are facing the problems of education for the first time, and for practical teachers who work in isolation and have but little or no opportunity of meeting and exchanging ideas with their fellows. The aim has been to give copious illustrations of actual work done by children in the hope of suggesting ideas to the reader which she may apply in varying form to her own work. Experience has taught that restless and inquiring pupils need a variety of forms of employment, hence an attempt has been made to indicate as many as possible of the simple arts and crafts open to them. Special emphasis is laid on the Gifts and Occupations of Froebel and on Dr. Dewey s experiments, because a thoughtful study of the work of these reformers cannot fail to be helpful and stimulating to any open-minded student. The introductory chapter is obviously sketchy and incomplete, but it may help the student to begin to understand something of the child s fundamental needs and then send her on to books which deal adequately with the subject.
