

The Messenger of Mathematics Volume N . 5

By William Allen Whitworth

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 42 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1876 Excerpt: . . . caused by the communication of Heat between a Surface and a Gas. Sir W. Thomson and Professor J. Perry, A graphical process for finding the form of a Hanging Drop, and other cases of the Capillary Surface of Revolution. J. Pearson, Notes on the Tides. J. N. Schoolbred, On the Half-tide Level at Liverpool. J. N. Schoolbred, On the Tides in the Irish Sea. (The last two papers were read in Section G, Mechanical Science.) The paper which excited the most interest of all the communications made in Section B (Chemical Science) was Professor Cayleys memoir On the analytical forms called trees, with application to the theory of chemical combinations; it contained a complete solution of the problem of determining the number of hydrocarbons C_{2n} for any value of n . For example, for C_{10} the author found that there were 799 isomers. The memoir was...
